

Telephone Notification System

**Subscribe to our text message service!!**

The Somerville Housing Authority uses a telephone notification service to send important messages to residents.

This is similar to the method used by the city to send out notices for school closings and snow emergencies.

In order to receive these messages, residents must make sure their manager has an up-to-date telephone number.

We also encourage residents to subscribe to our text message service by texting shaalert to 80123.

Messages are infrequent, but will contain important information to the SHA community.
